

Steven Prince
Project Director / Business Operations

Project Director Steven Prince is a licensed private investigator and computer forensic expert partnered with a former Special Agent of the FBI. He has managed and investigated hundreds of major cases ranging from white collar crime to complex business litigation involving millions of dollars. The majority of his career has focused on computer forensics, incident response and prevention, data recovery, password recovery, electronic surveillance systems, evidence preservation, physical security and data analytics.

COMPUTER FORENSICS PROJECT EXPERIENCE

- Lead investigator in major Antitrust criminal investigation involving over nine-hundred boxes of documents seized from several corporations. Developed organization plan, electronic database with scanned images of every page, keyword searching and analytics. Participated and testified in trial which resulted in a favorable jury verdict on all counts.
- Lead investigator in major employment litigation involving theft of electronic information. Preserved and analyzed evidence and discovered that information was in fact stolen prior to an employee's departure giving the company its needed leverage to pursue action.
- Lead investigator in major public domain case regarding the possible bribery of an independent expert witness. Plaintiffs submitted a forensic report that claimed evidence was tampered with, because the evidence was favorable to Defendants. Upon inspection of forensic evidence, Steven determined that the report was not tampered with and the Plaintiff's forensic examiner provided a false report. The Judge agreed and the case was subsequently settled.

COMPUTER FORENSIC GOVERNMENT EXPERIENCE

- Consulted with Special Agents in the FBI, IRS and Secret Service regarding computer forensic matters.
- Consulted with State and Local law enforcement computer forensic experts.
- Court appointed independent computer forensic expert
- Authorized by court to image, store and analyze digital contraband materials.
